

ANNUAL MEETING WITH STATE ENGINEER

January 31, 1973

11:00 a.m.

Fairview City Hall- Fairview, Utah

Don Nerseeth reported on water supply. water not as good as it looks. It looks like it will be an average year.

Time turned over to Don Prestwich, Chairman.

Minutes of the 1972 meeting were read and approved. Motion by James G. Olsen and seconded by Ruel Christensen.

Reed Cheney brought up the question on House Bill #79, concerning the changing of natural streams. It appears that anytime we want to do any flood control or erosion control or changing the channel, an application must be okayed by the State Engineer. A discussion of car bodies, trees, brush, etc. as a no-no. Rocks seem to be the best control material.

It was recommended that we contact Ray Nielsen and Stanley neese and tell them that we are opposed to Senate Bill #121 or the amendment to House Bill #79. Jay Peterson is to write each of these men a letter concerning this problem.

Ruel Christensen brought up the problem of the Bagnol Ditch. A tentative appointment was made of about March (during the week of 12016, 1973) with Stanley Green and the people concerned with the Bagnol Ditch.

Financial report was read and directed by Don Nerseeth.

Don Ray Christensen motioned that we accept the financial Statement as read and seconded by James Olsen. Motion passed.

Perry Jensen gave the Commissioners report. He reported that the system generally was in good shape. water supply was short and the delivery was 52% for the 1972 season.

A discussion was brought up about the Mower ditch and their problems of diversion. Stan Green is to meet with representatives of the Mower Ditch.

The Budget was recommended at \$3,605.00 for 1973.

Jay Peterson recommended that we be assessed for the full amount. Seconded by Reed Cheney. \$3,605.00. Motion carried unanimously.

Reed Cheney recommended Perry A. Jensen to the State Engineer as our 1973 water Commissioner. The recommendation was unanimous.

The Manti Sewer system was discussed and it was the idea that the reprocessed water would be returned to the river if it is not used in the immediate City area.

Carl Carpenter of the Central Utah Water Conservancy District talked some about the records of water distribution in the area. It was possible that the conservancy district may have some funds available for the project of a measuring device for the Bagnall ditch.

James G. Olsen moved that we adjourn. Seconded by Joe Dulew.
